

Guidance on Building an Online Presence & Networking Using chatgpt

1. LinkedIn
2. GitHub (for tech professionals)
3. Portfolio website or blog
4. Twitter X (for thought leadership)

Start from Creating Linked In Account

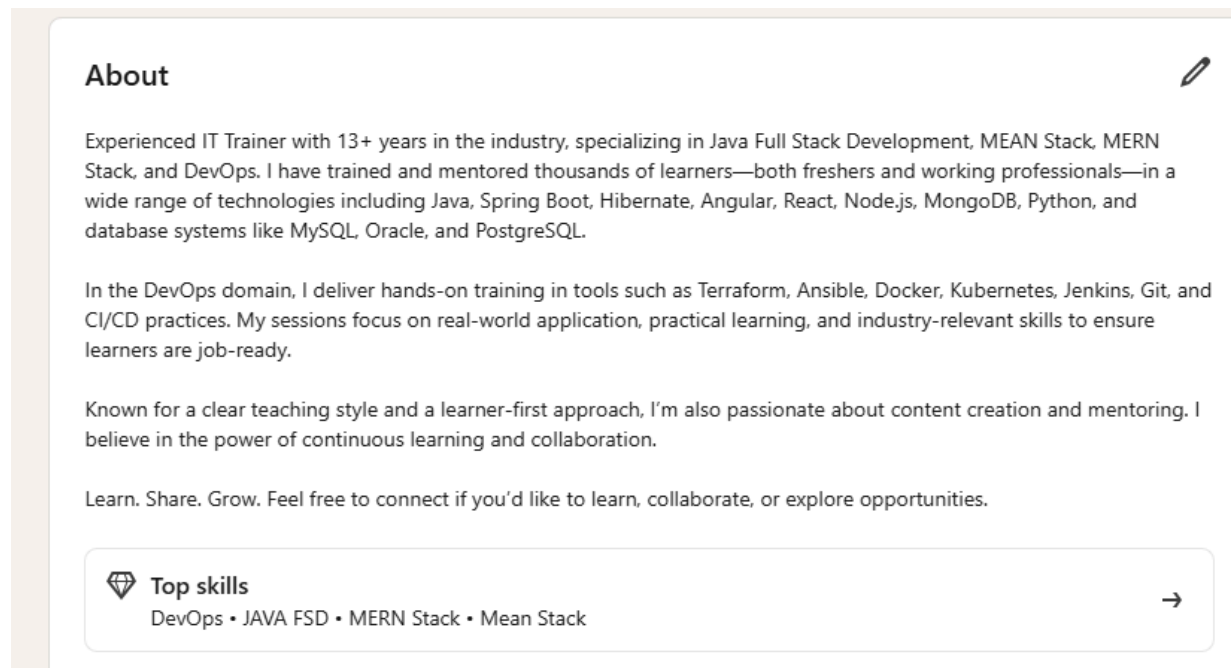

After that the first thing to set.

1. Profile Picture & Banner

- **Profile photo:** Clear, professional-looking headshot with a clean background.
- **Banner image:** Use a simple tech-themed background or a banner that says something like *"MERN Stack Developer | UI/UX Enthusiast"*.

2. Headline (Your Professional Title)

MERN Stack Developer | UI/UX Design Intern | Building Scalable Web Apps | BCA Graduate

For your case you can write like this.

I'm a BCA graduate with a strong foundation in web development and a passion for building user-centric digital experiences.

I recently completed a hands-on course in MERN stack development at Skill Academy, where I built responsive web applications using MongoDB, Express.js, React, and Node.js. Alongside this, I gained real-world experience as a UI/UX Intern at XYZ Company, where I contributed to wireframes and user interface improvements for client-facing web products.

Currently, I'm looking for opportunities to grow as a full-stack developer while continuing to learn and contribute to exciting tech projects. I'm eager to work in environments where I can collaborate, code, and create.

Education Details:

Education
